CAREER SUMMARY

Experienced and results-driven Senior Full-Stack Developer with over 8 years of experience specializing in building scalable web applications. Proficient in Node.js, React, Express, and cloud databases. Strong track record of designing high-performance RESTful APIs, implementing microservices architectures, and optimizing frontend performance for responsive and fluid user experiences.

SKILLS

- Core / Languages** : JavaScript (ES6+), TypeScript, HTML5, CSS3, Python
- Frontend** : React.js, Next.js, Redux Toolkit, Context API, Tailwind CSS, Sass, Bootstrap, Webpack
- Backend** : Node.js, Express.js, Nest.js, RESTful APIs, GraphQL, gRPC
- Architecture & Design** : MERN Stack, Microservices Architecture, Clean Architecture, Scalable System Design, Design Patterns
- Database & Storage** : MongoDB, PostgreSQL, MySQL, Redis, Prisma ORM, Sequelize
- Cloud & DevOps** : AWS (S3, EC2, SNS, SQS, Lambda), Docker, Kubernetes, GitHub Actions, CI/CD Pipelines
- API & Testing** : Postman, Swagger (OpenAPI), Jest, Mocha, Chai, Supertest, Cypress
- Integrations** : Payment Gateways (Stripe, PayPal, Adyen), Auth0, OAuth 2.0, Third-Party REST API Integrations
- Tools & Methodology** : Git, GitHub, Agile/Scrum, Jira, VS Code, Slack

PROFESSIONAL EXPERIENCE

- Senior Full-Stack Developer, Tech Solutions Inc.

Jan 2023 – Present
San Francisco, CA
- Led the migration of the core frontend codebase to React and TypeScript, resulting in a 40% increase in developer velocity and standardizing clean code practices.
 - Designed and implemented robust middleware APIs using Node.js and Express to process high-throughput live data streams with sub-100ms latency.
 - Integrated AWS SNS/SQS notification architectures to handle transactional user messaging serving over 50,000 active users.
 - Mentored junior engineers on RESTful API standards, system design concepts, and test-driven development (TDD) methodologies.
 - Architected a multi-region transaction pipeline supporting Stripe and Adyen integrations, handling over \$2M daily processing volume with zero downtime.
 - Implemented token-based authentication and end-to-end request signing, securing payment APIs against cross-site scripting (XSS) and injection attacks.
 - Developed automated reconciliation scripts running on cron schedules, reducing transaction audit discrepancies by 95%.

- Developed reusable component libraries with React and Tailwind CSS, reducing redundant code by 35% across multiple brand storefronts.
- Created backend integration modules connecting Stripe payment systems with secure Webhook processing and automated retries.
- Optimized SQL query performance in PostgreSQL database, reducing API response times for product catalogs by 25%.
- Set up automated CI/CD deployment pipelines using GitHub Actions, reducing manual deployment overhead by 90%.
- Designed a real-time event-driven inventory synchronization system using Node.js, Redis, and WebSockets, reducing stock lag times by 80%.
- Built complex data indexing pipelines in MongoDB, reducing query latency for inventory searches across 500,000 SKUs down to 12ms.
- Collaborated in daily agile standups and sprint planning sessions to deliver business-critical features on schedule.

- Designed and built an interactive analytics dashboard utilizing React, Chart.js, and Redux, enabling real-time metrics tracking for 100+ business clients.
- Reduced client bundle size by 22% using lazy loading, tree shaking, and Webpack optimization techniques.
- Created robust unit test suites using Jest and Enzyme, achieving 90% code coverage for critical path UI components.
- Refactored legacy API routing layer in Express.js, decreasing routing overhead and improving server throughput by 15%.
- Implemented JWT-based authentication and role-based access control (RBAC), securing sensitive client data endpoints.
- Maintained clear API endpoints documentation in Swagger, facilitating seamless integrations for external partners.

PROJECTS

EDUCATION

Master of Science, Computer Science, State University, California, USA	2015 – 2017
Bachelor of Science, Computer Science, State University, California, USA	2011 – 2015
